

The Fundamentals of Engineering (FE) exam is generally your first step in the process to becoming a professional licensed engineer (P.E.). It is designed for recent graduates and students who are close to finishing an undergraduate engineering degree from an EAC/ABET-accredited program. If you are considering entering a career where a P.E. license will be beneficial or required, taking the exam during, or just at the end of your senior year could be helpful.

FE Exam Preparation Options: There are several preparation options available, including exam prep textbooks, paid online study programs, and [NCEES](#) materials. Online prep program pricing varies.

Online prep company [PPI](#) offers a discount to WSU Vancouver students (\$145/6 months access). If interested in the PPI program, contact mary.bulger@wsu.edu to receive an individual discount code and instructions.
